Rockpave DESIGN SURFACING™

Smarter Paving Solutions

Rockpave Design Surfacing™ is a smart range of floor and pavement systems inspired by the warmth and beauty of natural stone and the vibrant colours of recycled glass

Rockpave

DESIGN SURFACING™

Architectural Applications

Rockpave Design Surfacing™ is a smart range of floor and pavement systems inspired by the warmth and beauty of natural stone and the vibrant colours of recycled glass.

The comprehensive range of decorative stones and tumbled glass available in a variety of sizes and colours offer a stunning alternative to traditional surfacing mediums. Customised Designs and glass highlights can also be incorporated to create unique outcomes.

And uniquely formulated resins bind and protect the stones and glass for a super tough finish with the optimum clarity, gloss and UV stability which will last for years.

SuperStone™

SuperStone™ offers a bold stone finish for exterior concrete or asphalt overlays. It is ideal for applications such as pedestrian paths, courtyards and entrance ways. Exceptional load bearing strength and flexibility is achieved through the optimum combination of aggregate size and specially formulated resin.

SuperStone™ is available in a wide variety of natural, river washed and contemporary coloured tones to offer the right “look” for all architectural styles. Further design effects can be achieved through combining colours and introducing other materials such as glass.

StoneCarpet™

INTERIOR SURFACING

StoneCarpet™ offers a stunning pure stone surface for interior applications overlaying concrete or timber floors. Any interior space calling for a design with a difference will benefit from StoneCarpet™

Combined with SuperStone™, it is ideal for designs that call for a seamless transition from outdoor to indoor space. Available in natural and coloured aggregates it is ideal for foyers, hotels, restaurants and retail premises to name a few. Again unique designs can be created through the use of different colours, sizes and alternate materials.

CrystalPave™

GLASS FEATURE SURFACING

CrystalPave™ uses recycled crushed glass to create stunning highlight features in exterior paving and interior flooring projects. Unlimited customised patterns and shapes can be formed to create unique designs with a broad spectrum of colours available. CrystalPave™ can be used to brilliant effect when combined with SuperStone™ or StoneCarpet™. Smart use of lighting can also be used to further enhance this outstanding material.

FlowStone™

HI POROSITY SURFACING

FlowStone™ is a high porosity surfacing system designed for efficient drainage of surface water. It uses larger, single sized stones for maximum water flow. FlowStone™ is ideal for applications such as urban tree pits and sand beds where a strong load bearing is required. It can also be used to great advantage to maximise the permeable footprint of a building development to meet increasingly stringent building regulations.

Multiple Colours and Custom Blends

RockPave Design Surfacing™ aggregate and glass are available in a wide variety of natural and vibrant colours. By combining and contrasting materials, the scope of customised designs is endless.
