Brick **N** Pave  
*Stamped Asphalt & Coloured Surfacing*

## **Educational Facilities**

### **Smarter Paving Solutions**

Brick N Pave coatings are developed specifically for coating Asphalt and Concrete substrates. Using our unique StreetBond colour technologies, we protect and enhance pavements at educational facilities.

# Why StreetBond Coatings?

StreetBond coatings are not just an asphalt coating. For many years, StreetBond has been coating concrete in decorative patterns & colours.

The benefit of StreetBond coatings compared to linemarking paint, coloured concrete or concrete paint is;

- Streetbond will not delaminate like other epoxy/glass based surface treatments.
- Streetbond uses a liquid pigment, and is made up of acrylic cross linked polymers, rendering it highly UV Stable (ie, won't fade/oxidise under sunlight).
- Streetbond can be re-applied on top of itself time and time again, making maintenance easy. Most other surfacing products require the removal of the original application prior to re-coat.
- StreetBond has a built-in Sealer and does not need reapplying periodically like other systems saving time and money.
- StreetBond™ coatings meet Australian Standards for Fire Retardant and Non-slip tests.

# BNP Safety Zones

Brick N Pavé specialise in ALL decorative pavements; from pedestrian crossings and traffic calming devices in high trafficked zones such as shopping centres, car parks, malls, school areas, restaurant/café precincts to green bike lanes, red bus lanes, and school zones.

Our highly visible coatings are perfect for road safety and awareness, and are also rated for slip resistance in wet or dry weather.

# BNP Decorative Enhancements

## Custom Projects

Using our unique StreetBond™ coatings, you can create anything, so let your imagination run wild. Simple or complex; big or small. Change a boring space into a decorative masterpiece.

Shopping Centres, Play Grounds, Footpaths, Paths.

## Safety Areas

**Custom Colours**  
**Custom Patterns**

High Visibility StreetBond™ coatings with enhanced skid resistance, creates awareness and reduces accidents for pedestrians on high slip/trip areas like steps, ramps, stair treads, footpaths.

## Stencils or Templates

Any custom stencil, or any custom template shapes on concrete or asphalt substrates.

Imagine it! Create It!
