

ONE DAY FLAKE SYSTEM

ADVANTAGES

The E2U One Day Flake System is industry leading in its speed of application and physical properties; generally, **one of these things comes at the cost of the other**. But not in this case. By combining E2Us unique 6150RC Epoxy with the equally class leading Polyaspartic85 as a top coat, your floor will have the best adhesion to your substrate, the advantage of an epoxy floor, with the superior speed and strength of a polyaspartic topcoat.

All this means you'll have the best performing floor for the **least amount of down time**.

This system can be scaled to nearly any size, meaning 100's of m2 can be applied in **a single day**, not 3-4 days as with traditional epoxy systems and less sophisticated polyaspartics. Best of all, its fully cured and ready for **full traffic 24hrs after completion**, while our competition wouldn't be finished applying yet.

FEATURES

- +High gloss and build
- +4 times the abrasion resistance of epoxy
- +Non-Yellowing UV stable
- +Chemical resistant
- +Low odour, none immediately after application
- +VOC compliant
- +Solvent free
- +Can cure just above freezing temperature
- +Will not support the growth of bacteria or fungus
- +Superior impact resistance compared to single colour applications

APPLICATIONS

- | | | |
|---------------------|-------------------------|------------------------|
| +Pharmaceutical | +Clean Rooms | +Veterinary Facilities |
| +Food Prep/Kitchens | +Showrooms | +Bath/Changing Rooms |
| +Garage Floors | +Schools | +Ramps/Walkways |
| +Laboratories | +Health Care Facilities | +Manufacturing Plants |
| +Basements | +Loading Docks | +Hangars |
| +Kennels | +Car Wash Facilities | +Driveways |
