

RAL colours

There can be differences between the RAL code and the actual DecoMark® colour, so the RAL colour codes are to be seen as guidelines.

9017

*Custom Colours can be made, but maybe subject to minimum run orders depending on order size and colour. Enquire today.

Colours may appear different on various monitors and screens. The colours you see on your screen may not be accurate reproduction of the actual DuraTherm material. We have made the colours above as accurately as possible. Upon availability, a colour sample may be provided upon request. Extra time may be required for producing samples of less commonly used colours.
